Message from the Chairman and CEO

Ankara, June 2001

The rapid development of internet based financial businesses and new technology across geographical borders has led to a substantial increase in competition amongst global financial markets. Jurisdictional barriers are becoming overcome and the ongoing liberalization of financial markets has led to a rising trend towards increased levels of international investment. As a consequence of the increase in competition within both national and international financial markets, investors are now being offered more competitive returns. In addition, continued consolidation and integration through mergers and acquisitions across many financial sectors poses important regulatory issues. Within this highly competitive and volatile framework of high levels of takeover, the regulation of financial markets plays a vital and crucial role in promoting efficiency, fairness and stability of the Turkish Capital Markets.

The Capital Markets Board of Turkey (CMB) was set up in 1982 in order to supervise, regulate and develop the conduct of capital markets in Turkey. CMB has undertaken all the dynamic precautions to monitor the operation of the securities market and to protect the rights of investors by providing a fair and compatible financial market.

The end of 1999 marked a significant era whereby amendments in the Capital Markets Law were made in order to establish strategic objectives that would help maintain the capital markets in Turkey at high international standards. Besides increasing the confidence for domestic investors, since 1989 every liberal action has been undertaken to increase the expected confidence of also all foreign investors. Moreover, within the changing macroeconomic and microeconomic environment and the implementation of structural reforms in the economy, investor confidence is most likely to be restored accordingly.

In order to reserve our global position within world financial markets, CMB is also in continuous co-operation with both international capital markets and institutions. The membership of the CMB to the International Organization of Securities Commissions (IOSCO) is the most important among them. Furthermore, CMB's Memorandum of Understanding activities with other regulatory bodies such as the Southeast European Co-operation Initiative Project (SECI) are progressing on an ongoing basis.

To sum up, within the short-term all of the intensive activities of the CMB will help us sustain our rightly deserved position within global capital markets.

1. CAPITAL MARKETS BOARD

1.1 Organizational Structure and Functions of the Board

1.1.1 Management and Organization

1.1.1.1 The Executive Board and The Chairman

The Executive Board consists of seven Members/ Commissioners who are appointed by the Council of Ministers. Two of the members are elected and appointed among four nominees who are determined by the Ministry of the State responsible for the economy. The other five Members/ Commissioners are elected among the nominees of the "Ministry of Finance", the "Ministry of Industry and Commerce", the "Banking Regulatory and Supervisory Board", the "Union of Chambers and Commodity Exchanges", and the "Association of the Capital Markets Intermediary Institutions". Each of these institutions nominates two candidates, one of whom is to be elected and appointed. All Members/ Commissioners are appointed for a period of six years. The Council of Ministers appoints one of the Members/ Commissioners as the Chairman and the

Board elects one member as the Deputy Chairman. The Chairman is the top executive who is responsible for the administration and representation of the Board.

The Executive Board is proclaimed by law to be at the highest level within the decision-making mechanism of the CMB and is empowered to decide on any issue within the authority of the CMB.

1.1.1.2 Executive Vice Presidents and the Departments of the CMB

There are four Executive Vice Presidents who are authorized and responsible for the coordinated operation and administration of the entire organization.

There are ten main departments, which are organized by function.

Department of Enforcement

The primary function of this Department is auditing of corporations, intermediary institutions, banks and other financial institutions operating in securities markets, and ensuring the conformity of their activities to the pertaining legislation. The Department is responsible for enforcing Capital Market regulations and investigating violations of the regulations.

Department of Corporate Finance

The Department of Corporate Finance examines and evaluates the registration applications of the corporations for their security issues. Major responsibilities of the department include reviewing the disclosure materials and developing standard application and disclosure forms in order to provide accurate and adequate information to the public.

Department of Intermediary Activities

This Department is authorized and responsible for reviewing and examining the applications of the intermediary institutions for operating in the capital markets. Among the responsibilities of the Department is to regulate the relationships of the intermediary institutions with issuing corporations and investors. The Department is also responsible for supervising the compliance of intermediary institutions to the capital adequacy requirements and for reviewing the financial statements of these institutions.

Department of Institutional Investors

The Department is mainly responsible for the regulation and supervision of principles regarding the establishment and operation of collective investment institutions and licensing of the intermediaries. The concept of institutional investors includes not only mutual funds and investment trusts engaging in securities trading, but also venture capital investment companies, real estate investment companies and social security funds. The regulation and supervision of the disclosure standards for collective investment institutions and management companies are also amongst the responsibilities of this Department.

Research Department

The Department of Research undertakes economic and financial research studies for the Board so that the Board can develop long-term strategies and undertake the appropriate actions based on sound determinations. This Department also makes policy recommendations for the development of new financial instruments, activities and markets. The Department also carries out the activities related to international relations of the CMB.

Department of Legal Consultancy

The major function of this Department is to be actively involved in the activities for the creation of regulations within the authority of the CMB. This Department provides legal consultancy services for the CMB and other Departments of the organization. The staff undertakes research studies concerning the legal aspects of the securities' markets and maintains the coordination with other related institutions in this field. The Department of Legal Consultancy also represents the CMB in any litigation.

Department of Accounting Standards

Department of Accounting Standards carries studies on the establishment of general and private accounting standards related to the institutions subject to the CML, in harmonization with international standards. It is also responsible for evaluating the applications for the establishment of independent auditing firms and also of rating firms that will operate in Turkey. The Department supervises the activities of independent auditing firms and the quality of the services that they provide.

Department of Market Regulations and Surveillance

This Department is responsible for overseeing the secondary markets including the derivatives markets. The Department's responsibilities are to develop necessary regulations for the secondary markets to operate efficiently and safely and also to develop surveillance systems for watching the trading in secondary markets.

Department of Data Processing, Statistics and Information

It was determined as an absolute necessity to establish a well-organized and computerized surveillance system for the markets due to the development of the Turkish securities markets, which increased the importance of the CMB's market surveillance in order to ensure fair and orderly functioning of the markets. Within this framework, the CMB carried out studies directed towards the reorganization of the Directorate of Data Processing and Statistics in the form of an individual department. The main responsibilities and functions of this department are to form a reliable and real database and to set up the system required for computerized data processing.

Department of Administrative and Financial Affairs

With its three major directorates this Department provides services in keeping the accounts and preparing the financial statements, and in dealing with the personnel matters of the CMB concerning their rights as employees, retirement and health care, social security benefits and other services offered to the personnel. Finally, the matters related to communications, buildings, repairs, purchases and maintenance of the equipment are conducted within the scope of authority of this Department.

Istanbul Regional Office

The Istanbul Regional Office of the CMB is mainly in charge of relations with the corporations, intermediaries and other capital market institutions. The Regional Office is authorized to inform related organizations about the activities carried out by the CMB and to ensure the coordination with these organizations. The Office provides the CMB and other departments with reports on the activities of the capital market institutions and makes comments on these. In the organizational structure its position is equivalent to the other departments.

1.1.2 Personnel Selection Strategy

The professional staff is selected by a written exam followed by an interview among university graduates in the fields of economics, business administration, law, international relations and public administration.

Distribution of the staff of the Capital Markets Board as at the end of 2000:

Executive Board	7
Advisors	1
Executive Vice Presidents	4
Heads of Departments	13
Senior Professional Staff	98
Junior Professional Staff	56
Lawyers	7
Assistant Lawyers	9
Administrative and Technical Support	179

TOTAL	374
-------	-----

1.2 Institutions under CMB Supervision

Capital Markets Board of Turkey licenses intermediary institutions and collective investment institutions, registers corporations issuing securities, and additionally supervises the clearing organization and securities and precious metal exchanges established in Turkey.

As at the end of 2000, the following were operating under the supervision of CMB:

- 843 corporations registered with CMB for shares issues, of which 315 were actively traded on the Istanbul Stock Exchange,
- 133 brokerage houses,
- 72 banks, which have license to deal in off-exchange trading and repo transactions,
- 270 mutual funds,

- 21 securities investment companies,
- 8 real estate investment companies,
- 1 venture capital investment company,
- 9 portfolio management companies,
- Istanbul Stock Exchange,
- Istanbul Gold Exchange,
- Takasbank (Clearing and Settlement Bank).

1.3 Litigation

In 2000, 65 cases against corporations, intermediaries and persons were brought before the public prosecutor by the CMB for the violation of various provisions of the Capital Market Law, the Turkish Criminal Code and the Turkish Commercial Code. Relevant provisions include insider trading, manipulation, unauthorized intermediation, disseminating misleading information, failure to keep records and documents, forgery, swindling and breach of trust.

There were 211 public prosecutions still pending as at the end of 2000. Decisions were declared for 107 of the criminal cases, and 234 criminal cases were still pending at the year end. There were 2 bankruptcy actions filed by CMB during 2000. Insolvency proceedings continued in 2000 for 12 of the bankruptcy cases that had been finalized. Nine of the civil cases filed by the CMB have been adjudicated in 2000.

2. THE TURKISH ECONOMY IN 2000

2.1 General Economic Developments

The main factor shaping the developments of the Turkish economy in 2000 has been the stabilization program that has been implemented to reduce inflation. With the elimination of exchange rate risk, interest rates have started to fall, stimulating investments and production of consumer durables and promoting imports. With these developments, the economy has entered a growth phase in 2000, following the contractionary period experienced since mid 1998. However, as a result of the liquidity problems faced in November, which also triggered the outflow of short-term capital, difficulties were faced in the implementation of the program and in the general economic activity.

2.1.1 National Income and Growth Rates

Following the contraction in 1999, where the GNP at constant prices declined by 6.1 % , in 2000 the economy entered an expansionary phase. For the first three quarters of 2000, GNP has risen by 5.4% compared with the same period of the previous year, and for the whole year, the growth rate has been 6.1%.

Total domestic output slightly changed in favor of the services sector whose share in gross domestic income rose to 63.7% and remained to have the highest contribution to domestic production. The industry sector followed the services sector with a share of 22.3% and the agricultural sector slightly declined to 14% from 14.6% in the previous year (Table: 1.1).

Table: 1.1- National Income and Growth Rates

	1996	1997	1998	1999	2000
GNP (TL. billion at current prices)	14,978,067	29,393,262	53,518,332	78,282,967	125,970,544
-Growth rate (%)	90.7	96.2	82.1	46.3	60.9
GNP (TL. billion at 1987 prices)	106,080	114,874	119,303	112,044	118,916
-Growth rate (%)	7.1	8.3	3.9	-6.1	6.1
Share of sectors in GDP(%)					
Agriculture	15.9	13.7	16.9	14.6	14.0
Industry	24.2	23.7	21.4	21.9	22.3
Services	59.9	62.6	61.7	63.5	63.7

Source: SIS

2.1.2 Foreign Trade and the Balance of Payments

The appreciation of the Turkish Lira, amongst other factors, contributed to the sharp rise in imports in 2000. With \$ 53.7 billion, imports exhibited a rise of 36% over 1999, while exports only rose by 7% to \$ 31.3 billion. Consequently, trade deficit increased to \$ 22.3 billion. The current account balance rose sharply to \$ 9.8 billion in 2000 from \$1.4 billion in 1999.

In the first half of 2000, foreign borrowing through government securities had been the major source of financing of the current account deficit. Fund collection through government bond issues totaled \$7.5 billion throughout the year. In the second half of the year, short-term capital inflows gained momentum. Moreover securities trading abroad by residents and long term credits obtained by the non-banking sector and by the general government have been substantial, resulting in a total capital inflow of \$ 9,445 million in 2000 (Annex 4-Table: 1).

Short-term capital inflow had been around \$4 billion. While for the first seven months, outflow of short-term capital was realized, in the following period the course changed to net inflow, heavily influenced by

commercial credits obtained by the corporate sector and short-term borrowings of commercial banks.

There has been a net inflow of capital into Turkey through portfolio investments throughout the period of 1989-2000, with the exception of 1988.

For the first three quarters of 2000, net capital inflow through portfolio investments had been \$ 6,032 million. However, the liquidity problem faced in November resulted in the sale of foreign exchange reserves by the Central Bank. Following this, non-residents have realized \$ 5.2 billion of securities sales and consequently, \$ 4.8 billion of capital outflow.

2.1.3 Price Movements

Although the stabilization program implemented during the course of the year, aiming at reducing inflation has not been sustained and the target rates have been exceeded, a slow down of price movements has been observed compared to the previous year.

As of the end of 2000, consumer prices rose by 39% compared to the previous year-end. On a 12 month average basis, the rise in consumer prices was 54.9%, both showing a decline from the previous year figures of 68.8% and 64.9% respectively.

DIAGRAM 1.1: PRICE MOVEMENTS

Source: SIS

The wholesale price index increased by only 32.7% compared with the previous year and figure. For 1999, the same yearly increase had been

62.9%. On a 12 month average basis the increase was 51.4 %, which is below the figure of 53.1% for 1999(Annex 4-Table: 5).

The highest price increase took place in the mining sector by 56.1%, followed by the energy sector with 37.4%. Agriculture and manufacturing exhibited price increases of 39.8% and 29.4% respectively.

As to the difference between public and private sectors, wholesale prices rose by 69.4% in the public sector, whereas the increase was 45.8% in the private sector, based on 12-month average. On a year-end basis, public sector prices had an increase of 24.7% whereas private sector increased by 35.7%.

2.1.4 Consolidated Budget and Public Finance

As of the end of 2000, the consolidated budget cash deficit amounted to TL 12,027 trillion. The cash deficit to GNP ratio was 9.5%.

Expenditures in the consolidated budget totaled TL 46,602 trillion, with a rise of 65% from the previous year figure. In the expenditures, share of transfers kept the highest ratio with an increase from 60% in 1999 to 65% in 2000.

Income figure reached TL 33,756 trillion in 2000, increasing by 78% from the previous year. Taxes were TL 26,514 trillion, making 79.8% of the total income (Annex 4-Table: 4).

2.1.5 Foreign Borrowing

Foreign borrowing kept its rising trend also in 2000. The total value of foreign debt stock rose to \$114.3 billion as of the year-end, which corresponds to an increase of 10.6% from previous year level.

Of this total, 74.5% was medium to long-term debt, 55% of which was used by the public sector. Of the \$ 28.9 billion short-term debt, 58.5 % was used by commercial banks (Annex 4-Table: 3).

Foreign exchange composition of borrowing diverges between short term and medium-to-long term borrowings. As of the end of the third quarter, US dollar based foreign debt constituted 6.8% of short term borrowing, and 51% of medium-to-long term borrowing. Foreign debt based on Euro or on currencies constituting Euro have a greater weight in medium-to-long term borrowing.

2.1.6 Industrial Production and Capacity Utilization

The production index of the State Institute of Statistics with base year 1997 increased to 100.9 in 2000 from 95.8 in 1999. As of the end of December 2000, the capacity utilization ratio in the manufacturing industry was 76 (Annex 4-Table: 6).

Among the reasons for not working with full capacity, insufficient domestic demand had the greatest weight with 48.9%. With 12.5 %, insufficient foreign demand also had a large adverse effect for not using full capacity. However both these figures had been higher in 1999 as 55.3% and 14.6% respectively. Shortage in raw materials, both domestic and foreign, increased their weight to 5.1% from 3.5%. Financial problems remained to have small impact with 2.8%.

DIAGRAM 1.2: CAPACITY UTILIZATION RATIO AND PRODUCTION INDEX

Source: SIS

2.2 Financial Market Developments

2.2.1 General Trends

The level of financial assets rose to the level of TL 98,282 trillion in 2000, exhibiting an increase of 45% over the previous year. This figure remained well below the previous year increase of 99%, and accordingly, the ratio of total financial assets to GNP figure decreased to 78% in 2000 from 86% in 1999 (Table: 1.2).

Share of banking sector in financial assets, which rose up to 60% in 1999, declined to 56% in 2000. Financial assets of the banking sector, together with the special finance houses reached the level of TL 54,611 trillion, which amounts to a 35% increase over the previous year (Annex 4-Table: 9).

Table: 1.2- Financial Assets (%)

	1996	1997	1998	1999	2000
Total Financial Assets / GNP	57.8	60.0	63.3	86.3	78.0
Share of Banking Sector in Total Financial Assets	62.0	60.2	59.6	59.9	55.6
Share of Capital Markets in Total Financial Assets	38.0	38.82	40.4	40.1	44.4
Share of Private Sector in Capital Markets	13.4	13.3	13.9	14.0	15.7

Source: CMB, Central Bank, Undersecretariat of Treasury

Keeping its increasing trend, the capital markets share in total increased to 44% in 2000 from 40% in 1999. Share of the private sector in capital markets also increased in parallel to the 81% increase in shares stock value.

2.2.2 Banking Sector

2.2.2.1 Money Supply

The volume of currency issued in 2000 increased to TL 3,214 trillion, reflecting a 70% increase over 1999 year end.

Narrow money stock (M1) reached TL 8,209 trillion with a 92% increase over the previous year. Sight deposits had a share of 61% in the narrow money stock, whereas currency issued had a 39% share.

Broad money stock (M2), which had exhibited a rise of 92% in the previous year, rose by 49% in 2000 and reached the level of TL 32,812 trillion by the year-end.

Foreign exchange deposits rose by 89% in 2000, raising the level of M2Y to TL 57,167 trillion. M3 attained the level of TL 34,479 trillion by the year end (Annex 4-Table: 8).

2.2.2.2 Deposits

Total deposits in the banking sector reached TL 5,275 trillion, including foreign exchange deposits. This figure displays a 33% increase over the previous year.

Time deposits had the second largest share in this total with 39%. The largest share belonged to foreign exchange deposits of banks, with 48%. Official deposits exhibited a 51% increase over the previous year and reached a total of TL 1,204 trillion in 2000.

Interest rates showed a decline over the course of the year in parallel to the measures taken as a result of the stabilization program, however, with the liquidity problems emerging in November, interest rates changed course. As of the end of the year, three-month time deposit interest rate was 105% and one-month rate was 81%, showing higher rates for shorter maturities. Six-month and one-year deposits had interest rates of 69% and 46% respectively (Annex 4-Table: 10).

2.2.2.3 Credits

Credits extended by deposit money banks amounted to TL 27,372 trillion in 2000, exhibiting an increase of 61.3% over the previous year. 93% of this total was given to private enterprises and households. The public sector and financial institutions received 2.9% and 2.7% respectively, while less than one percent was given to non-residents (Annex 4-Table: 11).

DIAGRAM 1.3: SECTORAL BREAKDOWN OF DEPOSIT MONEY BANK CREDITS

Source: Central Bank

2.2.3 Gold Market

One important factor in the gold market in 2000 has been the buoyancy experienced in the amount of gold imported. Gold imports have risen by 91.2% from the previous year in 2000 and reached a record amount of 205,300 kg.

Table : 1.3a - Istanbul Gold Exchange (IGE)

Year	Amount of Trading		Total	Trading Volume	
	TL/GR	\$/ounce		(TL. Billion)	(\$ Million)
1996	102,831	71,129	173,960	108,594	888
1997	178,121	113,367	291,488	287,527	1,215
1998	265,532	173,748	439,280	683,711	1,640
1999	277,734	213,740	491,474	1,052,077	1,908
2000	299,740	129,430	429,170	1,681,172	1,160

3. TURKISH CAPITAL MARKETS IN 2000

3.1 Primary Markets

3.1.1 Private Sector Security Issues

The increase in the volume of corporate security issues has been more than six- fold in 2000. The total market value of these issues reached TL 5,793 billion in 2000, after the level of TL 855 billion in 1999. Main categories contributing to this growth were shares and mutual fund participation certificates, having 52% and 47% share in total volume respectively.

DIAGRAM 2.1: CORPORATE SECTOR SECURITY ISSUES REGISTERED WITH CMB

Source: CMB

Additionally, although in small amounts, issues of corporate bonds, bank bills and bank guaranteed bills, and foreign mutual fund participation certificates have taken place in 2000, after a period of no activity in 1999 (Annex 4-Table:14). As of the end of 2000, there were 839 corporations with publicly offered equities registered with CMB.

3.1.2 Public Sector Security Issues

Issues of public sector securities exhibited an increase of 23% in 2000 and reached TL 32,518 trillion, whereas last year there was an increase of 86%. This reflects a slowdown in the issue volume.

Since 1999, government bonds have taken the lead in the total issue volume as opposed to short-term treasury bills, which had been the dominant factor in government securities. Treasury bill issues showed a decline in 2000 and were realized as TL 5.782 trillion, after TL 6,858 trillion in 1999. Privatization bond issues increased by 36% in 2000 and reached TL 49.6 trillion (Annex 4-Table: 12).

DIAGRAM 2.2: GOVERNMENT SECURITIES ISSUES

Source: Undersecretariat of Treasury

3.1.3 Initial Public Offerings

Total market value of IPO's registered with CMB by 37 companies amounted to TL 1,841,822 billion in 2000. This figure shows that, of the total of TL 3,007,974 billion shares issues registered with CMB during the year, IPO's made up 61% (Annex 4-Table: 15).

Table: 2.1 - Initial Public Offerings

(TL. Billion)

Year	No. of Corporations	Nominal Value of IPO	Market Value of IPO	Free Float Ratio	Market Value of Sales
1996	27	2,985	14,475	41.68	14,700

3.2 Secondary Markets

The negative effects of liquidity problems faced in November 2000 were seriously felt in all areas, and naturally also in the securities markets. The rising interest rates and the resulting decline in asset prices and trading volume were clearly seen in both the equities and the bonds and bills markets.

Secondary market trading showed a decline from the previous years figure of TL 1,085,442 trillion to TL 965,153 trillion in 2000. Banks trading on government securities, as always, dominated the trading volume in the secondary markets. With TL 753,013 trillion of trading in government securities, banks had a share of 78% in the total trading volume. Brokerage houses, on the other hand almost had equal amounts of trading in shares and government securities each ranging around TL100,000 trillion (Annex 4-Table: 17).

3.2.1 Secondary Market Trading in Debt Instruments

Secondary market trading on debt instruments concentrated in government bonds, which had a 87% share in total. This was followed by treasury bills, which had a share of 13%. Trading on private sector instruments remained negligible (Annex 4-Table: 18).

3.2.2 Equities Trading in the Secondary Market

Equities trading volume in the Istanbul Stock Exchange reached TL 111,340 trillion in 2000 with a 200% increase over 1999, making an average daily turnover of TL 452 trillion. This average turnover exhibits a rise of 189% over the previous year (Annex 4-Table: 20).

In equities trading, frequency distribution of intermediaries reveals a highly concentrated structure, with a few number of intermediaries having large volume of trading. As can be seen from Table 2.3, the first 20% of total transactions have been made by only 5 intermediary institutions, whereas in the last quintile there are 91 intermediaries with small trading volumes (Table: 2.3).

Table : 2.3 - Frequency Distribution of ISE Secondary Market Trading of Equities

	RANGES				
	1st Range (20%)	2nd Range (20%)	3rd Range (20%)	4th Range (20%)	5thRange (20%)
No. of Brokerage Houses	5	7	11	19	91

Note: Total secondary market trading volume of TL. 111,341 trillion is divided into five ranges, each of which is TL. 22,268 trillion.

DIAGRAM 2.4: ISE SHARES MARKET TURNOVER

Source: ISE

The rising trend in the secondary market transactions can also be seen in the number of contracts, which rose to 32 million in 2000 from 25 million in 1999. Similarly, total and average daily number of shares traded exhibited considerable increase reaching TL 11,075 trillion and TL 452 trillion respectively (Annex 4-Table: 20).

Table : 2.4 - ISE Equities Market

Year	Turnover Ratio (%)	Price / Earnings Ratio	Dividend Yield (%)
1996	92.8	12.2	2.87
1997	73.3	24.39	1.56
1998	170.5	8.84	3.37
1999	60.4	37.52	0.72
2000	238.5	16.82	1.29

Source: ISE

The ISE Composite Index, after closing 1999 with 15,208 rose to 16,714 by the end of January, and kept falling throughout the year. December close was at a level of 9.437 (Annex 4-Table: 22).

3.2.3 Corporations Listed on the Istanbul Stock Exchange

As of the end of 2000, the total number of corporations with stocks listed on the Exchange declined to 315 from 319 in 1999. Total nominal value of shares quoted on the exchange rose to TL 6,276 trillion in 2000 from TL 3,793 trillion in 1999.

Total market capitalization of the companies listed on the Istanbul Stock Exchange was TL 46,692 trillion as of the year end, reflecting the decline in equity prices since the beginning of the year (Annex 4-Table: 19).

DIAGRAM 2.5: MARKET CAPITALIZATION

Source: ISE

3.3 Financial Intermediaries

The total number of financial intermediaries licensed to operate in the Turkish securities markets have reached 133. Of this total, 46 were established by banks as brokerage houses (Table:2.5).

Table: 2.5 – Total Number of Financial Intermediaries

	1997	1998	1999	2000
1. Brokerage Houses	142	143	136	133
Founded by Banks	42	45	46	46
Other	100	98	90	87
2. Banks*	63	66	73	72
TOTAL	205	209	209	205

*Banks can only be licensed to engage in off-exchange intermediation in securities that have been previously issued and intermediation on the exchange with the exception of equities and to engage in repo and reverse repo transactions.

3.4 Collective Investment Institutions

3.4.1 Mutual Funds

By the end of 2000, the total number of Turkish mutual funds reached 270. Of this total, 150 were Type A funds, which need to have a minimum of 25% investment in equities. Moreover, there were 20 foreign mutual funds, whose participation certificates were issued in the Turkish market.

The total asset value of the 150 "Type A" funds were TL 529,998 billion, with 9,250 million certificates in circulation. "Type B" mutual funds had a total asset value of TL 1,460 trillion and 7,924 million shares in circulation (Annex 4-Tables: 24,25)

Portfolio composition of "Type B" mutual funds consisted basically of reverse repo agreements (86%) and government bonds (13%). "Type A" funds also relied heavily on reverse repo agreements (42%), following equities (46%). Government bonds had a share of 11% in the portfolios of "Type B" funds (Annex 4-Table: 23).

Seven foreign mutual funds have started to market their participation certificates in Turkey in 2000. Together with the previously authorized foreign funds, their number reached 20 by the year end (Annex 4-Table: 26).

3.4.2 Investment Companies

Total number of investment companies reached 30 by the end of the year 2000. Of this total, 21 were "Type A" Investment Companies, with a collective nominal capital of TL 51.9 trillion and a total asset value of TL 78.6 trillion. The existing 8 real estate investment companies raised their nominal capital to TL 187.9 trillion in 2000, and their asset value reached TL 531.8 trillion. In the course of the year, one venture capital investment company has been established, showing TL 900 billion of nominal capital and TL 3.3 billion of total asset value as of the year-end. (Table: 2.7)

Portfolio composition of "Type A" investment companies showed little difference from the previous year, with a slight inclination in favor of reverse repo transactions. Share of equities declined from 57% to 56%, whereby share of reverse repo rose from 27% to 30%. However, all this increase took place together with a decline in the overall asset value of the companies, which fell from TL.84 trillion in 1999 to TL 78 trillion in 2000 (Annex 4-Table: 27).

Table: 2.6 - Investment Companies

		No. of Companies	Nominal Capital (TL.Billion)	Total Asset Value (TL.Billion)
1996	"Type A"	14	2,740	5,924
